

John Cooper Conversions

The John Cooper Sports Handling Pack.

To complement the 1990's Mini Cooper, John Cooper has developed the New John Cooper Sports Handling Pack.

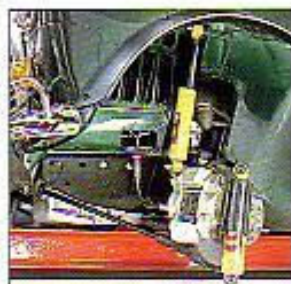

Consisting of five wide section low profile tyres specially developed for the Cooper by Dunlop, plus a pair of rear wheel spacers and a set of four fully adjustable shock absorbers.

Handling and road holding are improved even further, besides making your car look pure race bred!

The John Cooper Sports Handling Pack is available exclusively through John Cooper Conversions and may be fitted if required at John Cooper's own workshops.

Individual items may of course be purchased separately together with other car accessories offered.

Fully adjustable shock absorbers may be adjusted in position and further improve road holding.

Low profile wide tyres, 165/60 x 12, increase grip in all conditions and of course look superb.
N.B. Rear wheel spacers and longer studs must be fitted with these tyres.
